Summary

I am often found juggling with interests that include coding, graphic design, all the way to appreciating good coffee and nerding out over pop fiction, astrophysics and dystopian literature. I have 4 years of experience in full stack front end development based around ReactJS and bootstrap, illustrations, graphics and motion design.

Working with Barclays around Enterprise and Data Integration Infrastructure Administration
ETL tools include Informatica and Ab Initio

On the side I work with a remote, non-conforming design collective based in Paris focused on creating visual identity. Our collective has experience in diverse fields such as design, photography, animation among a few.

Experience
