Summary

I am often found juggling with interests that include coding, graphic design, all the way to appreciating good coffee and nerding out over pop fiction, astrophysics and dystopian literature. I have 4 years of experience in full stack front end development, illustrations, graphics and motion design.

Co-Founded a remote, non-conforming design collective based in Paris focused on creating visual identity. Our collective has experience in diverse fields such as design, photography, UI/UX design among a few.

Working with Barclays around Enterprise and Data Integration Infrastructure Administration and Automation. ETL tools include Informatica and Ab Initio

Pursuing Masters in Economics from Ferguson College under Pune Uni's Open Learning Program

Experience

Service Delivery Analyst

Barclays

Apr 2021 - Present (2 months +)

Working with Barclays around Enterprise and Data Integration Infrastructure Administration and Automation.

ETL tools:

- Informatica
- Ab Initio

Co-Founder and Designer

The Jellyfish Collective

Jun 2020 - Present (1 year +)

The collective specializes in branding, visual identity and helping startups create design-based systems. Jellyfish was built on the notion of restoring balance to the relationship between designers and collaborators and create long-term partnerships.

Graduate Analyst

Barclays

Aug 2019 - Apr 2021 (1 year 9 months)

Barclays Global Service Centre (BGSC), India is a global capability center, supporting Barclays businesses worldwide, delivering innovative end-to-end business solutions in Technology, Operations and Functions.

Co-Founder and Designer

Infin8y Labs

Sep 2016 - May 2020 (3 years 9 months)

A hobby venture revolving around the idea for designing and manufacturing stationary and wearable accessories - posters, bookmarks, notebooks, calendars, pin-badges, t-shirts and more. Designing and Production were my primary responsibilities.

Project Intern

Persistent Systems

Sep 2017 - Jun 2018 (10 months)

Aim of the project was to create an Autonomous Drone and was done in a group of 6 students. The project involved working with cutting edge hardware technology.

I was looking after the simulation and designing terrains in Unity 3D Game Engine

Design and Technical Head

MIT CREON

Aug 2016 - Feb 2018 (1 year 7 months)

Web Development and Digital Marketing for MIT CREON 17, MIT CREON 18 along with graphic design for publicity boards and posters. The project also included an SMTP server ticket booking platform for an event.
